New Technologies Engineering and Production Enterprise LLC specializes in the manufacturing of block-modular oil and gas equipment for the development of oil and gas fields, such as automated group metering skids (standard and mobile versions), chemical injection skids, pig launchers and receivers, oil, water and petroleum products pumping stations, quality and quantity parameters metering systems for oil, water and gas.

Besides that, the company provides well dewaxing and repairing services, maintenance of automation equipment for production and treatment processes.

OILTEAM COMPANY LTD

-  Building 1, Televizionny Lane
3, Tomsk, 634003, Russia
-  +7 862 225 54 47
-  info@oilteam.net
-  oilteam.ru

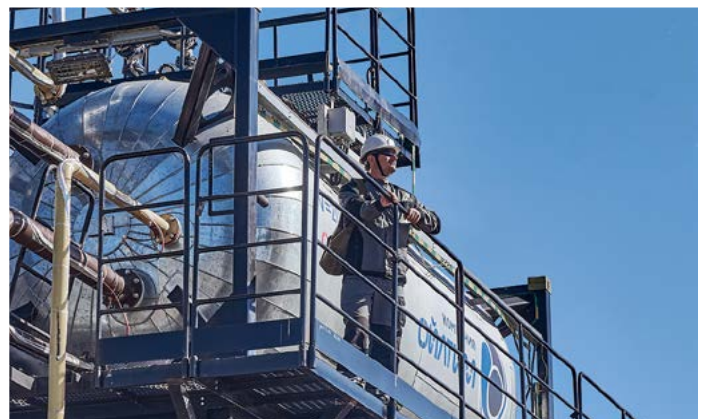

OILTEAM – a premier service company providing integrated solutions for the oil and gas industry since 2010. We deliver advanced technologies and engineering expertise to maximize recovery and optimize field development.

CORE EXPERTISE:

- Early Production Facilities
- Well Testing & Completion Systems
- Field Development & Engineering

KEY ADVANTAGES:

- Standard Equipment Available: Rapid deployment with ready-to-ship units from stock.
- End-to-End Delivery: Full turnkey service from concept and design to installation and maintenance.
- Fast-Track Execution: Swift mobilization and installation, with project timelines from just two weeks.
- Risk-Reducing Model: Our flexible rental options include full equipment maintenance, reducing client CAPEX and transferring operational risks to OILTEAM.

SKB EP is an innovative full cycle enterprise which specializes in development and manufacturing of the electrotechnical equipment test devices.

Since 1991 the SKB EP devices are successfully used in energy and power industry, oil and gas industry, electric facilities of the railway, air and water transport, production of high-voltage equipment and steel industry.

The SKB EP devices are reliable and certified due to the international standards high precise instruments which guarantee fast testing results. The devices application allows to reduce the high-voltage equipment diagnostic process by 1.5 times, decrease the equipment repair costs by 30% and reduce the human factor influence due to the full measurement process and data processing analysis automatization.

Sales geography – 23 countries, more than 15.000 customers worldwide.

MANUL LLC is the exclusive distributor and representative of SKB EP LLC.

NEW TECHNOLOGIES OF THE NORTH LLC

Tekuteva Street 1, Borki,

PIEZUS is a leading manufacturer of a wide range of electronic pressure transmitters, submersible level probes and flowmeters for a broad range of applications and industries.

With the goal to provide our customers with products of the highest quality, we employ the latest technologies and state of the art equipment.

Our team is knowledgeable and passionate and includes experts that have decades of combined experience in the electronic pressure measurement. In addition to standard product line, we are able to develop and manufacture custom products to meet our customers' requirements.

Our manufacturing process and highly trained technicians are a guarantee of high quality products.

Our sales partners and customers from around the globe know that we are a trustworthy and responsive partner ready to anticipate their needs, meet, and exceed their expectations.

SPK RESURS LLC

SPK Resurs LLC is a Russian industrial company specializing in the production and supply of equipment, materials, and engineering solutions for the road construction and petrochemical industries. Its core products include BERK industrial pumps designed for bitumen, polymers, oils, and other high-viscosity media.

The company supplies road and modified bitumen, SBS polymers, plasticizers, modifiers, and sulfur, and provides engineering, design, and construction of bitumen terminals, tank farms, and process units. SPK Resurs LLC also develops and implements industrial automation and process control systems, delivering integrated turnkey solutions.

TUROPLAST LLC

Room II, Simferopolskaya
Street 15, Podolsk, 142184,
Russia

+7 495 740 90 01

info@turoplast.ru

turoplast.ru

Turoplast is a Russian manufacturing company that produces polymer compositions based on high-pressure polyethylene for technical purposes with the addition of a thermostabilizer. The company's products are used in the cable and pipe industries as insulation and anti-corrosion materials.

Polymer compositions are materials produced on the basis of high and low density polyethylenes with the addition of thermo and light stabilizers. The materials have balanced physical and mechanical characteristics and are intended for the application of insulation, shells and protective covers of power cables and communication cables, as well as for the anti-corrosion coating of steel pipes with a diameter of up to 1720 mm in two and three-layer design.
